

Discrete multibody systems with 54

Beispiel:

$\tilde{u} : \mathbb{R} \rightarrow \mathbb{R}$ gegeben als das Ableiten von $\tilde{u}$ ist $\tilde{u}' = 0$

Sei $\tilde{u} : \mathbb{R} \rightarrow \mathbb{R}$

[illegible]

$ds = \vec{r} \cdot d\vec{\theta} = r d\theta$
 (positiv) $\Rightarrow$ $\vec{r}$ und $d\vec{\theta}$ im selben Winkel

 $\Rightarrow$ ds = Längenelement / Bogenlänge
 $\Rightarrow$ $\int_0^{\theta} r d\theta = r \theta = s$

$$ds = r \, dz$$

$$s = \int r \, dz = \frac{r}{2} \ln z^2 + C$$

Grupo negativo en la prueba Cap C

Sensazione di dolore in un campo magnetico esterno

Two any angles

2a) $\angle A = 2\pi \cdot \frac{1}{2} \cdot \frac{1}{2} = \frac{\pi}{2}$

any two angles

any two angles

→ From Calculus
